

COASTAL JIBS

Snowpark equipment
2025/2026 • CATALOG

We have come a long way since the very first rail was built and brought to our local ski and snowboard hill over 19 years ago! It has been a challenging but rewarding journey. From day 1, our constant drive to improve our products and services has never stopped and has helped us develop a large number of satisfied clients. It is a great privilege for us to be a part of the skiing and snowboarding industry, and we look forward to many more years of exceeding your expectations in product quality and safety!

Some figures...

Over the years, we have built more than 1,900 features, used approximately 160,000 feet of pipe and steel tubing, 2,600 sheets of plastic, and over 130,000 nuts and bolts!

Thank you to everyone who has been involved along the way!

Any reproduction, printing, or adaptation of this publication, by any means, whether electronic, mechanical, photographic or microfilm, cannot be done without prior permission of Coastal Jibs Inc.

While some people may think of skiing and snowboarding as great outdoor activities, we feel it's a way to express our individuality within every motion and detail.

When it comes to engineering new features, connecting metal pieces together or refurbishing our customers' installations, the same attention to detail goes into our products and services and is what sets us apart.

It's our responsibility to stay current with trends while providing safe options that promote growth and foster excitement. That's why my team and I are fully committed to offering the best products across North America.

Richard Côté

QUALITY

At Coastal Jibs, we put our heart and soul into creating a premium quality product that goes beyond expectations. Our entire product line is carefully handcrafted in our Sherbrooke (Québec) workshop to ensure a quality that is truly unbeatable!

WARRANTY

Coastal Jibs offers a 5-year limited warranty on all of its products. Colligated with the refurbishment program, a 10-year extended warranty is also available.

* This warranty does not apply to any failure, damage or defect caused by the installation, use or maintenance of the product by the buyer, its employees, customers, users, successors or assigns.

SLIDING OPTIONS

Innovation plays a large role at Coastal Jibs, which is why we offer several sliding surfaces that suit all skill levels. We also offer custom-built features to meet all of your specific needs.

TECHNICAL OVERVIEW

Everything is in the details

**OUR PRODUCT REFLECTS OUR
PASSION FOR THE SPORTS**

MINI-SHRED FEATURES

Designed for the next generation

The range of Mini shred features has been designed to target young riders. The miniature sizes as well as the nonexistent metal side profiles make these accessible and safe for the kids. Thanks to their ground-level entry and exit points, the Mini Shred features allow the little riders to enjoy an eased learning experience from their very first day at the mountain!

Height: 36" | 60"

JUNIOR FEATURES

The first step to progress

The junior series consists of unique beginner obstacles that are ideal for all age groups. The wider surfaces and relaxed angles allow for entry-level skiers and riders to initiate themselves into the exciting world of rails and boxes. The higher skilled skiers and riders can also practise and perfect their technique safely on these mellow features!

TRANSFER FEATURES

Elevate your Transfer game

A rail transfer involves the art of seamlessly jumping from one rail or sliding surface to another while executing tricks or maneuvers, demanding a blend of precise timing, balance, and skill. These transfers are often observed in the current scene of street and competitive skiing and snowboarding and allow riders to showcase their abilities.

The features below provide a safe and user-friendly way to unleash creativity with transfers, even enabling you to slide on two rails simultaneously!

PIPES

Endless trick possibilities

Drawing their inspiration from the industrial scene, the pipes mimic the wacky forms of plant piping, providing a unique look. The wide diameter of these tubes allows for a large contact surface, which facilitates the sliding of the riders. Their rounded shapes are the perfect solution to make the complex modules even safer.

FLAT

WALLRIDE FEATURES

The centrepiece of your snowpark

Wall rides are often some of the biggest and most impressive features of any terrain park. Their large surfaces are ideal display areas for graphics and sponsor logos. To facilitate moving the wall rides, we can weld them to a ski-type frame, so they can be slid rather than lifted! All wall surfaces are covered with HDPE plastic to ensure the best sliding sensation.

CUSTOM FEATURES

Let your imagination run free

At Coastal Jibs, we provide top quality event set-ups that will blow the minds of your competitors and spectators. We offer custom features allowing you to create the course of your dreams! Whether it's replicating an existing urban environment with complex staircase configurations or creating a unique set up that will give you the atmosphere you want, we can do it all! Sponsors and media play a big role in the event world and we want to help you make an impact by creating something original. Challenge us with your ideas and visions and we will make your projects become reality!

Even with a fully outfitted shop, we at Sugarbush Parks sometimes need to outsource a job. From quality products, unbeatable prices, to impeccable customer service, Coastal Jibs is who we call for the wild builds!

SNOWTOOLS

Your park staff's best friends

Would you cut steak with a plastic knife? Neither would we. Building a nice terrain park is one thing but maintaining it is a different story. That is why we offer specialized snowtools that can make your job more enjoyable. The versatility of these tools lets you accomplish your job more efficiently and faster than ever before.

Available in both handle options

 Stoneham, QC

LA CHARRUE

* New

Length: 60"
Width: 26"

The Scoop's cooler cousin just showed up. Stainless teeth for extra bite, aluminum for easy handling, and a quick-release head that makes travelling with your tools almost too easy. Pack it, snap it, shape it—repeat.

SCOOP

Length: 60"
Width: 26"

Digging out features after a big dump of snow? No problem! The Scoop rake has a large powder coated aluminum blade that allows you to move great quantities of snow around. Ideal for heftier tasks.

SWINGER

Length: 60"
Width: 26"

From maintaining lift stations to working on pipe transitions, the Swinger is the ideal snowtool for all jobs, whether small or medium-sized. Its lightweight and sharp teeth allow you to easily cut through hard snow and ice.

*Junior model available

VERT SHOVEL

Length: 60"
Width: 10"

This razor-sharp stainless steel blade will make the sides of your jumps look like Lego Blocks!

Ideal for shaping hips, berms, and anything that needs a precise clean cut.

* D-shape Telescopic handle option

ACCESSORIES

GRAPHICS

Advertisements and graphics often play a large role in everyday Terrain Parks. The unique shapes and large display areas of rails and boxes become the ideal location for your resort's logos and sponsors! We offer top-quality vinyl graphics and artwork on our smooth side panels. Ask us for more details.

OBSTACLE MAINTENANCE

We now offer a cutting-edge module maintenance service designed exclusively for our valued customers. This turnkey solution is conducted directly on-site at your resort, not only extending the lifespan of your obstacles but, more importantly, prioritizing the safety and satisfaction of your customers. Don't hesitate to reach out to us for further details.

DELIVERY

Coastal Jibs offers delivery at extremely reasonable rates across Canada & the U.S., not to mention FREE shipping on park orders of at least \$25,000 CAD within a 1500km radius of our headquarters.
